DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29 and 43, drawn to a method, system, and computer usable medium for classifying chromatograms, classified in class 704, subclass 231.
- II. Claims 30-35, drawn to an automated method for classifying chromatograms, classified in class 704, subclass 31.
- III. Claims 36-41, drawn to a second automated method for classifying chromatograms, classified in class 702, subclass 20.
- IV. Claim 42, drawn to a user interface, classified in class 345, subclass 700.

The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I-III can be shown to be distinct, each from the other, in that they use substantially different method steps that would require non-coextensive literature searches.

The user interface of Group IV can be shown to be distinct from each of the methods as it is not required by any of the methods.

Because these inventions are distinct for the reasons given above and the search required for Groups I-IV are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
